JUSTSALT®DUO+

- Pool treatment by saltwater chlorination & pH regulation
- Easy & Efficient
- Your Best Buy!!!

The natural care for clear water

JUSTSALT®DUO+

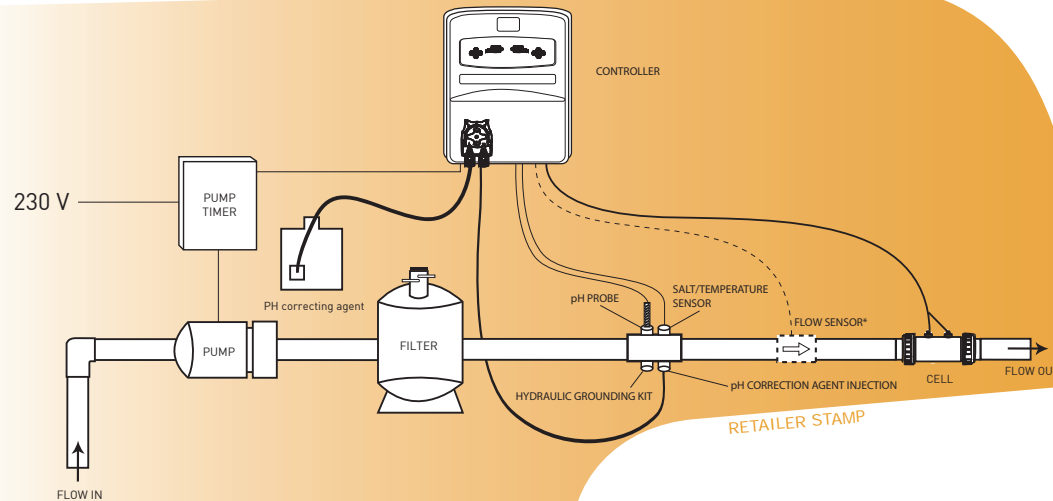

Saltwater chlorination & pH regulation

JUSTSALT®Duo+ controls the two essentials for water disinfection: disinfectant production & automatic pH regulation. Your pool is free of chemical disinfectants all season long. With **JUSTSALT®Duo+**, the maintenance of your pool is no longer a hassle.

JUSTSALT®Duo+ produces a powerful and efficient disinfectant by saltwater chlorination. From lightly salted water as 5 kg/m³ (7 times less salty than sea water) **JUSTSALT®Duo+** manages on its own the disinfection of your pool.

Besides, **JUSTSALT®Duo+** regulates your pool pH level automatically. Thanks to its probe, which analyses the water continuously and to the injection of the corrective pH agent, **JUSTSALT®Duo+** maintains the pH at an ideal level (7 to 7.4).

* In case of independent flow sensor installation

Easy to install and use, **JUSTSALT®Duo+** is your guarantee for an efficient disinfection and a pleasant and comfortable swim.

- **2 models** for pools up to 100 and 150 m³ in temperate climates, 80 and 120 m³ in hot climates
- **Ready to use** comes with its chlorination cell, its accessories holder, its factory calibrated pH probe and its analysis kit & accessories
- **Adjustable production** by digital pad from 0 to 99%
- **Self cleaning by progressive polarity inversion**
- **Adjustable polarity inversion** from 0 to 24 hours according to water hardness
- **Proportional pH regulation with adjustable set point from 6.8 to 7.6**
- **Permanent digital display of your pH and production percentage**
- **2 lights:** green indicates correct operation/ red indicates a malfunction
- **Alarms for chlorination:** water shortage/no flow/low salt level/low temperature/ scaled or deteriorated cell
- **Alarms for pH regulation:** low or high pH/pH overfeeding
- **BOOST mode** for a super chlorination for 24 hours
- **Pool cover function** to modulate the chlorine production according to the pool cover position
- **Works for all salt concentration from 2.5 kg/m³**
- **Disinfectant production:** up to 28 g/hr
- **Compatible with all filtration systems and pool surfaces**
- **Installation on new or existing pools**
- **In line cell assembly without orientation hassle**
- **Materials & accessories guaranteed 2 years from date of purchase (except pH probe)**

Option: pH probe guaranteed 1 year

Option: hydraulic grounding kit to eliminate any electrostatic charge.

Option: automatic cover cable

Option: independent flow sensor

Option: short cell (165 mm) for small installation areas

Option: empty can alarm for pH correcting agent

*Option: filtration controller with **SIMPLEO***
